

ALEXIA JOURNÉ

POSITION: Project manager in New Technologies Division

COMPANY: Sanef

Alexia works as a project manager for Sanef, a French motorway company, more specifically orientated on new technologies and ITS matters. She has been involved in the Euro regional projects since 2000, first for the Centrico programme then for EasyWay. She is currently co-leader of the topic “Intelligent Truck parking” in the EasyWay European Study “Freight and Logistics”.

Alexia will be presenting the following at the conference:

Guidelines for deployment of Intelligent Truck parking

One of the major issues of the EasyWay European Studies are the deployment guidelines aiming at producing common specifications for future deployment projects. This presentation will aim at outlining the results of the work on the core service “Intelligent truck parking”, conducted in the framework of the EasyWay European Study on Freight and Logistics.
