

JÜRGEN WEHNERT

POSITION: Chief Operating Officer

COMPANY: Move & Park SAS

SETPOS RESPONSIBILITY: Leader Work Package 3, Security Standard

Jürgen Wehnert has a track record in information technology in logistics. He was one of the inventors of the national trade exchange system and has implemented electronic data exchange way before the internet had been invented. Trained both as an electronics engineer and in paedagogics he is comfortable in a wide range of activities.

His competence areas comprise general information technology, remote ID techniques (RFID), Smart Cards, standardization, (intermodal) supply chain and supply chain security, system design, market positioning and one-stop-shopping support when it comes to the implementation and marketing of complex systems.

With Move & Park Jürgen has co-shaped the SETPOS proposal. He is working in most of the Work Packages and has a special focus on the shaping of the project's security standard. He is also active in LABEL, the sequel to SETPOS.

Jürgen will be presenting the following at the conference:

Sound and positive security standard

The security standard is one of the three core "products" of the SETPOS project. Making a standard is a lengthy, labour-intensive and at times strenuous endeavour. The questions to be constantly asked are: Will it be good, will it be accepted? As always, the proof of the pudding is in the eating. The presentation will provide the following:

- Aim and market of the standard
- Who has made it, who supports it
- What is the position of the standard
- The elements of the standard
- How to read and implement the standard
- The SETPOS sites and the standard
- Outlook: Life after SETPOS
