

RUDOLF ANNER

POSITION: CEO

COMPANY: Move & Park SAS

SETPOS RESPONSIBILITY: WP 5: ICT Platform

Rudolf Anner, former manager with Shell and Unilever; 9 years CEO of a 200 mn logistics company. 25 years of experience in pioneering transport telematics, including parking. Built several consortia for EU projects.

Before founding Move & Park, and bringing together the two consortia SETPOS and LABEL, his Swiss company Allmobile has conducted a 2 years' study on pan-European truck parking. This led to the concept of www.truckinform.eu

Rudolf will be presenting the following at the conference:

Truck parking information, guidance and reservation portal

Move & Park SAS, Paris, was founded to develop the pan-European ICT platform truckinform.eu with 3 core services:

1. Information / portraits of truck parking areas (both public and private; so far 2500 in 40 countries)
2. Parking guidance system: collecting and distributing dynamic availability data, esp along the European motorway network, in connection with Service 1
3. Reservation/pre-booking service, based on Services 1 and 2

We thank the European Commission/DG TREN for the financial contribution made, as well as consortium members who have contributed, in money and/or knowledge.

The established platform will have to be enhanced with dynamic data and more parking areas with approved data. It will play an important role in the EU project LABEL.
